ABOUT ME

Team lead and senior full-stack developer with over 8-years experience.

PROFESSIONAL EXPERIENCE

Team Lead and Developer | Elhub AS

May 2020 – t.d.

Oslo, Norway

- Project Lead and developer for new reporting platform. Replacing an old Oracle reporting tool with a partly new full stack reporting application. Front-end portal, Rest API service and data warehouse. **Tools:** React, Design System, Rest API
- Project Lead and Team Lead for new test data portal and Rest API used for generating and inserting test data to shared environments. Including DevOps work and implementing continuous deployment. **Tools:** Typescript, React, Design System, Storybook, Ktor, Docker, Ansible
- Project Lead and Squad Lead for new test automation suites and test data generation tools for enabling automated testing for product areas metering values and settlement. **Tools:** Kotlin
- Software Developer and Architect for the test platform. Including work on developer experience and continuous integration pipelines. **Tools:** Kotlin, TeamCity

Senior Consultant | Netlight AS

August 2018 – April 2020

Oslo, Norway

- Test Manager and Test Developer in development project for a large Norwegian retail company. **Tools:** React, GraphQL, Figma, Design Systems
- Test Automation engineer at a large Norwegian SaaS payment provider. **Tools:** Node.js

Consultant | Sogeti AS

August 2016 – July 2018

Oslo, Norway

- Test Data coordinator at a large Norwegian bank and modern IT-organization.
- Technical Tester and Test Developer at a Norwegian bank and credit card provider. **Tools:** SQL
- Functional tester in a Norwegian public health company.

Internship | VismoX AS

June 2015 – July 2015

Molde, Norway

- Working on the physics engine of an indoor cycling application. **Tools:** C++

PROJECTS

fjelldatabasen.no | 

 January 2020 – t.d.

- Building an application for mountain enthusiasts. Main feature is being able to see what mountains you have ascended while tracking with Strava. This is done by synchronizing all Strava activities and matching with all mountain data points in Norway. **Tools:** Node.js, React, Next.js, Express.js, Rest API, MongoDB, Figma, Chakra UI, Auth0, AWS Amplify, AWS Lambda, AWS EC2

Frait AS | 

 February 2022 – May 2023

- Seeing the large potential for digitalization in the seafood logistics sector, we decided to try building a digital freight forwarding platform for the Norwegian air freight salmon exporters, while connecting with market actors and building our own team and product. We did some pivots along the way. Biggest achievement was making a successful integration with a German client. We had to put this project on hold, but it was a fun learning experience trying to build a start-up. **Tools:** Node.js, React, Next.js, Express.js, Rest API, GraphQL, MongoDB, Figma, Storybook, Chakra UI, TailwindCSS, Auth0, AWS Amplify, AWS Lambda, Github Actions, Svelte

EDUCATION

Master of Science (M.Sc.) Physics and Mathematics | **NTNU**

 August 2010 – March 2016

 Trondheim, Norway

- Mathematical Modeling, Object Oriented Programming, Problem Solving, Algorithms, Data Structures, Numerical Calculations, Data Science, Statistics.

Qualified for Norwegian Higher Education | **Molde VGS**

 August 2007 – May 2010

 Molde, Norway

- Specialization in science. Mathematics, physics, chemistry and geology.
